# Faster, easier and twice as efficient

That's Duo mops for cleanroom cleaning

# Two sides. Half the effort!

The less time you spend on cleanroom cleaning, the less you interfere with keeping the core business running.

The unique Duo mop concept is the perfect answer to meet the high demands for effective cleaning and disinfection of cleanroom and controlled environments.

Faster, easier and twice as efficient as traditional methods.

Time is money and with the Duo mop concept you can reach a cleaning efficiency that no other system can match. The Swep Duo mops allows you to achieve your contact time requirements for common disinfectants, and still reaching an excellent cleaning performance with up to 99.9 % bacteria removal\*.

Quite simply – the CleanTech Duo and SanTech Duo mops form the most efficient and the most reliable cleaning concept in the market, for contamination control.

## Nothing beats microfibre

When it comes to cleaning performance and contamination control, microfibre is the name of the game!

The unique and patented composition removes and holds particulates from the surface, plus it has up to 99.9 % bacteria removal.

## Unbeatable speed and ergonomics

The Duo mop concept gives you twice the area to clean with the same mop head. This saves you 50 % of unnecessary walking, dipping and wringing – meaning you save time, increase speed of cleaning and improve the ergonomics.

You change mop side by simply flipping the frame over, which means several advantages versus single sided mops:

- 100 % more floor coverage
- 50 % less dipping and wringing into the bucket
- ±50 % less mop changes compared to single sided mops
- ±40 % less mops to purchase for cleaning the same area

## We've been around

Vileda Professional has been a leading player in the cleaning business for over 50 years. Also working with many of the largest pharmaceutical and biotech companies in the world.

Naturally, our products and systems meet business standards and practices such as ISO 14644-5, IEST RP CC018 and life science GMPs.

With more than 60 engineers and scientists constantly developing business-leading solutions we know what you need – you can count on that.

## CleanTech Duo mop

- Microfibre laminated cleanroom foam for cleaning/disinfecting floor, walls and ceilings
- Designed for use in cleanroom class ISO 5/GMP A+B/FED209D Class 100
- Excellent microfibre cleaning results has been independently proven
- Suitable for bucket and pre-prepared method

\*Validated by external institute BMA

**Colour coded** telescopic handle

**High ergonomics**, and ease of use are critical in ensuring mopping is carried out correctly

**Aluminum construction** suitable for autoclaving, which allows for use in highest grade areas

**The light-weight telescopic handle** is adjustable to your length, with soft grips for easy and comfortable handling.

**Patented\* double sided mop design** with inner core made of foam plus outer cleaning surface.  
\*USA, China, Germany

**Trolley is fully autoclavable** and is specifically designed for the highest standards within clean and controlled environments.

The trolley can be customised to your requirements, with single or double buckets and extra storage for clean refills.

**Extremely easy to use** – after using one mop side simply flip the frame over and continue cleaning, using a clean mop side.

### SanTech Duo mop

- Polyester laminated cleanroom foam for disinfecting floor, walls and ceilings
- Designed for use in cleanroom class ISO 5/GMP A+B/FED209D Class 100
- Excellent liquid absorbency as well as good lint-free resistance
- Suitable for bucket and pre-prepared method
