

Technical Declaration

Double Bucket System Mop Coverage

June 22, 2021

Dear End-user,

Vileda Professional's MicroControl and MicronSweep mops can be wrung 5-7 times in a double bucket system (double buckets, double wringing, includes the double bucket dolly & double bucket trolley).

In the double bucket system, the coverage of mops ranges from 20-25 sqm each time; so, the total coverage per mop is 100 - 175 sqm.

If you have any question please reach out to your sales representative.

Sincerely,

Leo Gubenko
Global Group Technical Manager
Controlled Environments

Omar Betouni
Quality & Technical Sales Manager
Controlled Environments

Vileda products are subject to FHCS Internal Quality Management System in which highest standards to the selection of raw materials are applied.

As a leading company of manufacturing and distributing mechanical cleaning products in Europe, we put special emphasis on the compliance with the European standards and follow the EC regulations.
